First Quarter 2012 Earnings Release

May 8, 2012
Under the Private Securities Litigation Act of 1995
This document may contain or incorporate by reference forward-looking statements as defined under the federal securities laws regarding DCP Midstream Partners, LP (the “Partnership”), including projections, estimates, forecasts, plans and objectives. Although management believes that expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to be correct. In addition, these statements are subject to certain risks, uncertainties and other assumptions that are difficult to predict and may be beyond our control. If one or more of these risks or uncertainties materialize, or if underlying assumptions prove incorrect, the Partnership’s actual results may vary materially from what management anticipated, estimated, projected or expected.

The key risk factors that may have a direct bearing on the Partnership’s results of operations and financial condition are highlighted in the earnings release to which this presentation relates and are described in detail in the Partnership’s periodic reports most recently filed with the Securities and Exchange Commission, including its most recent Form 10-K and most recent Form 10-Q. Investors are encouraged to consider closely the disclosures and risk factors contained in the Partnership’s annual and quarterly reports filed from time to time with the Securities and Exchange Commission. The Partnership undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Information contained in this document is unaudited, and is subject to change.

Regulation G
This document may include certain non-GAAP financial measures as defined under SEC Regulation G, such as distributable cash flow, adjusted EBITDA and adjusted segment EBITDA. In such an event, a reconciliation of those measures to the most directly comparable GAAP measures is included in supplementary material to this presentation on our website at www.dcppartners.com.

(a) Excluding keep whole sensitivities
(b) Assuming 60% NGL to crude oil price relationship. At crude oil prices outside of our collar range of approximately $80 to $97, this sensitivity decreases by $0.8 million
(c) Assuming 60% NGL to crude oil price relationship and $90.00/Bbl crude oil price. Generally, this sensitivity changes by $0.8 million for each $10.00/Bbl change in the price of crude oil. As crude oil prices increase from $90.00/Bbl, we become slightly more sensitive to the change in the relationship of NGL prices to crude oil prices. As crude oil prices decrease from $90.00/Bbl, we become less sensitive to the change in the relationship of NGL prices to crude oil prices.

Over 85% of 2012 margins are fee-based or supported by commodity hedges
Long-Term Cash Flow Stability

- Approximately 60% of 2012 forecasted margin is fee-based
- For commodity-based margins, approximately 75% hedged on crude oil equivalent basis in 2012
  - Approximately 60% of NGLs hedged using direct products in 2012

Multi-year hedge positions provide cash flow stability
Financing Growth for DPM and DCP Midstream
Co-Investment Alternatives

**Direct Investment / Acquisition**
DPM directly invests capital in “MLP friendly” assets that are part of larger strategic investment for DPM and DCP Midstream
- Wattenberg NGL pipeline
- DJ Basin fractionators

**Organic Build**
DPM provides the capital to build all or part of a proposed processing plant or other growth opportunity
- Size and capital / cash flow / contract profile are key determinants of feasibility and selection of project
- Eagle Plant
- Texas Express

**Dropdown / Redeployment**
DCP Midstream sells all or a portion of an asset for cash raised by DPM in the capital markets
- Asset selected for sale would have or would be structured for “MLP friendly” characteristics
- Southeast Texas
- East Texas
## DCP Midstream: $4+ Billion in Execution

**Attractive fee-based earnings growth from quadrupling NGL pipeline capacity**
